

ABSTRACT

COOKING ASSISTANCE DEVICE

VB
VB
VB
5 The invention relates to a device for assisting in
culinary preparation, comprising a plurality of electric
household appliances (10, 20, 30) and a remote monitoring and
control apparatus (2). According

VB
VB
10 According to the invention, the user can select a
prerecorded culinary preparation that is modeled as a
sequence of steps of preparation and, in the course of at
least one step, the monitoring and control apparatus (2)
receives a condition signal SE from certain of the electric
household appliances, and emits toward certain others a
control signal SC dependent on the one hand on condition
15 signals SE and on the other hand of prerecorded operational
parameters.
